sales@bluethumbponds.com

Included:

- Rectangle Basin
- 1-piece grate top
- Lifetime Manufacturer Warranty

*Interior view of
molded basin*

What is the product used for?

The Artesian AquaBox® is designed as a foundation and reservoir for recirculating water in displays with medium fountains. This basin houses the pump, plumbing, auto fill valve and water reserve.

When do you use this product?

Use when installing a recirculating fountain piece in almost any landscape or hardscape environment. Artesian AquaBox® basins can be installed in ground or above ground depending on the desired elevation of the fountain display.

How is it sized?

Basin size is determined by the dimensions and weight of the fountain pieces it must support, as well as the desired flow rate and flow pattern that is expected from the fountains. The goal is to retain as much of the recirculating water as possible.

Special features:

- Strong structural design manufactured in the USA using Medium-Density Polyethylene (MDPE)
- Easy plumbing installation through molded top grate holes
- 5-year Warranty

Recommended add-on products:

- Auto Fill Valve paired with a 30 psi Regulator for automatic water level maintenance
- Mesh Sediment Screen to reduce debris falling through grate into the basin
- 2-3 bags of Polished Pebbles to cover grate when finishing

TECHNICAL INFORMATION

Overall basin dimensions:

52.75" L x 28.75" W x 16" H

Full grate dimensions:

47.5" L x 23.75" W x 2.75" H

Reservoir volume:

66 gallon capacity

Max static load rating:

Up to 1500 lbs.

Product dry weight:

Approx. 70 lbs.
