

Water Feature INSPIRATIONS

Why put a Blue Thumb water feature in your landscape?

It's Attractive

...And not just for the birds! Water attracts your senses. Visually you see the moving water and you are drawn to gaze closer. As you approach a water feature you are filled with the tranquil sounds of the moving water and the wonderful aroma of flowers.

When you have family and friends over, guess where they're inevitably going to gravitate and congregate?

Feels good, doesn't it?

It's Tranquil & Peaceful

Put down the cell phone, walk away from the television, and immerse yourself into the wonderful world of water features. Moving water is mesmerizing and peaceful to look at.

The water feature experience is comforting and soothing. It transforms your senses and calms your world. Grab your favorite drink and retire to the patio and soak in the peacefulness of your water feature.

It's the Zen thing to do!

It's Low Maintenance

Following trusted Blue Thumb methods of installing water features, your new water feature will be very easy to maintain.

Some of the water features available have little to no maintenance at all. Some will require you to spend 10 minutes a week.

Choose the style that fits your budget as well as your available maintenance time.

**Easy peasy.
Just like we like it!**

Why NOT put a Blue Thumb water feature in your landscape!

It's Cocooning

Why not bring that “weekend getaway” feeling to your backyard? Some of our favorite memories are of sitting around outside near the water. There’s just something about it that resets and reconnects us to ourselves.

Bring that waterfront retreat from stress to your home, and enjoy its soothing, comforting benefits everyday.

Can you hear that cascading waterfall already?

It's A Good Investment

Many new water feature hobbyists tell us that the money they invested into their water feature was money well ever spent.

What is peace of mind worth to you? You'll be happy to know that an investment in your landscape is the best and most cost effective way to increase the value of your home.

We like the sound of that!

It's Built to Last

State-of-the-art technology allows our team to create customized, high-quality products for water features. You can trust our American-made products to stand up to everything Mother Nature dishes out.

We manufacture our products to withstand the elements and perform the same 20 years down the road as they do when installed.

You have our unconditional guarantee on that!

The Water Feature Advantage

Blue Thumb Water Feature FAQs

Things to Consider

- Your Best Views;
Indoor & Outdoor
- Utility Locations: Water,
Electrical, Underground
- Deck, Patio and/or Benches
For Outdoor Enjoyment
- Maintenance Level

Fit your water feature to your vision and your lifestyle ... ask questions!

Blue Thumb ponds, waterfalls, and fountains can be wonderful additions to any landscape, but should be carefully planned if your dreams are to become a reality and not a disappointment. Planning requires careful assessment of your goals for your water feature. Your local professional installer will guide you through your options and answer your questions. They will see that you are well on your way to enjoying a beautiful water feature.

What type of water feature is best?

The answer to this question depends on how much space you have available, your budget, and the amount of time you are willing to spend maintaining the feature. Use this Water Feature Inspirations Book to make the best choice for you & your family.

What size is best for my space?

You will want to base this on your available space and budget. We always tell people to build as large as they can afford, but not so large that it looks out of place in your landscape. This honestly isn't a line used to raise the sales price as high as possible. The fact is, most people build their water feature 3 times during its lifetime and the reason is that they want it bigger. As your hobby grows so does the water feature.

What is the cost?

The installed cost of a water feature can range from \$1,000 to \$10,000+. The average professional water feature installation is around \$3,500 depending on the type of feature and size you choose.

How long does it take for installation?

Most water features can be installed in one day or less with minimal or no damage to your lawn. Some larger water features make take two or three days. Consult with your local Authorized Blue Thumb Contractor for specific details on your project.

Can I have fish and plants?

Yes! As long as you have a water garden or pond. Some of the other water features can support plant life but not fish. Adding fish to your pond will have a positive effect on the ecosystem and creates a new & exciting element to your feature.

Do I need to winterize my water feature?

In some cases yes, but it's easy and usually just consists of removing the pump.

What is the next step?

Call one of our Authorized Blue Thumb Contractors for a home consultation and get started today!

Find Out More About Our Water Features

In November, we put out a call for projects using Blue Thumb products. We love seeing the final projects!

This Inspiration Book contains tagged images of work created by Blue Thumb contractors and homeowners from across the nation.

The photos tagged with a number ID were received from contractors, for more information about these professionals see page 79.

We invite you to dream up a waterscape to match your style!

Fish Ponds & Water Gardens

Photo 06-1

Create A Low-Maintenance Backyard Ecosystem

Fish are an integral part of the pond ecosystem. Fish can actually reduce pond maintenance as they graze and eat string algae and bottom feed on the ponds bottom.

Aquatic plants are Mother Nature's true filters, helping keep the pond clean and clear. There are many options like water lilies, lotus, marginal shoreline plants, and floating plants.

Homeowner DIY

Aquatic plants are great for hiding your Cascade Box.

A Splash of Color For Your Yard

Fish add color and personality to your pond. They clamor for attention, especially at feeding time. We carry the products that give your garden fish the quality care and environment that leads to long life spans. Your family will adore these delightful pets for years to come.

Homeowner DIY

How It Works

- A Biological Waterfall Boxes**
Filters harmful waste and toxins from water, keeping your pond clean and clear. Provides excellent surface area for beneficial bacteria growth while making a simple and artistic way of creating a waterfall. They are easy to camouflage to appear as a natural waterfall — especially when using our Landscape Lid.
- B Black PVC Flex Hose**
Carries water around the pond from skimmer box (H) to the biological waterfall box (A). The flexibility of our hose makes it much easier to install than rigid PVC.
- C Aquatic Plants**
Plants can be placed throughout the pond or along the pond's edge. There are many varieties: floating, marginal, sinking, oxygenators and lilies. Water garden kits are great when your desire is to keep many colorful and beautiful aquatic plants.
- D Rocks & Gravel**
Provides additional surface area for beneficial bacteria to colonize. Protects liner from harmful UV rays and damage from animals. Creates a very natural look.

- E Fish**
Adding colorful Koi and Goldfish creates an even more dramatic display. Water gardens are great for Goldfish and Koi.
- F Protective Underliner**
A non-woven, protective underliner fabric forms a soft padding for the liner. Installs much quicker than newspaper and covers the vertical walls unlike sand. Unlike carpeting, it allows gases to escape out the sides from the earth's soil.
- G Fish-Friendly Rubber Liner**
Super-strong 45-mil EPDM liner is the best choice when building a pond. Very flexible — conforms to pond's curves and slopes.
- H High-Efficiency Pump**
Pump sits in back pump chamber protected from clogging by nets and filter mats. Blue Thumb pumps are recommended as they will use far less electricity and are meant to operate continuously. The Pump creates a recirculation system that keeps the water moving, draws the debris and leaves into the skimmer, and keeps the waterfall fed with a constant supply of fresh water.
- I Mechanical Skimmer Box**
Simplifies routine maintenance by removing floating debris before it sinks to the bottom of the pond. It also protects the pump and hides unsightly plumbing.

Pond-Less Cascading Waterfalls

Homeowner DIY

Perfect for Trouble Areas

This landscape area had a steep slope that could not be planted and mulch would wash away during rains. The perfect solution was adding a pond-less waterfall feature to this landscape.

Perfect for homeowners who want the sights and sounds of a waterfall without the maintenance of a pond.

Photo 15-1

Pond-Less Means Less Maintenance

Cascading Waterfalls make an excellent choice in many settings, both residential and commercial. From short and narrow falls to wide and long falls, the design opportunities are endless so let your creative juices flow!

Small Space Cascades

Small waterfalls can have a big impact on your outdoor space. These water features can create an outdoor oasis with movement and the calming sounds of trickling water. Customize a look that flows naturally with the landscape of your backyard.

Photo 17-1

Pond-Less Cascading Waterfalls

Photo 18-1

A Safer, Easier Way for Families to Enjoy Flowing Falls

Our Pond-Less Waterfalls let you enjoy all the restful and relaxing benefits of a waterfall without the safety or maintenance concerns of a pond. Families with young children or small yards will delight in this beautiful option.

Photo 19-1

How It Works

A hole is dug then lined with a Firestone® EPDM Liner, Basin Matrix boxes are added to keep the reservoir open and available for water, then the basin matrix boxes are covered with rock and gravel, and filled with water.

The water is then circulated from beneath the rocks and gravel by a Pump that sits on the bottom, inside a Pump Canyon. A Flex Hose runs from there up to a Cascade Waterfall Box and into an overflowing waterfall, where it falls back into the reservoir. Since the water level never pools above the level of the rock and gravel, it gives the appearance of a waterfall without a pond, when in fact, the “pond” is there but not visible.

Pond-Less Cascading Waterfalls

Retaining Wall ~ Formal Falls®

Photo 20-1

Light it Up

Lighting below the falls illuminate the water wall in any color you choose.

Photo 20-2

DAY

NIGHT

Bring Your Retaining Wall To Life With Formal Falls®

Water flows from a spillway embedded in a retaining wall and falls into a basin below in a nice, smooth sheet. Our beautiful Formal Falls® can transform any vertical block wall structure into a spectacular stream of color with remote controlled LED lighting. They are a great alternative to ponds or fountains.

Get Creative with Your Retaining Wall Waterfalls

These waterfall walls can easily be added to any block wall structure using spouts on up to multiple spillways placed in a row. They can be used to adorn a garden, pool, outdoor living area, or even a home or business!

Photo 22-1

Photo 22-2

Photo 22-3

How It Works

The Formal Falls™ molded Basin is placed on a suitable base with the Pump protected inside the basin. Wall block or other suitable material is stacked all around the molded basin. The Formal Falls Stainless Weir rests inside the wall block and is covered. The pump inside the basin pumps the water via Tubing to the Formal Falls spillway where the water flows out from the retaining wall in a nice, smooth sheet over Polished Pebbles covering the basin. An LED light, shining up from the basin, can be added to illuminate the waterfall for a spectacular night display.

Fountains & Garden Accents

Photo 24-1

Vase Fountains

Placed singly or in multiples, our crafted ceramic water features serve your senses with the sights and sounds of bubbling water in several worldly styles. Pages 26-31.

Photo 24-2

Photo 24-3

Real Stone Fountains

Polished or natural, these fountains are expertly chiseled from real stone from a variety of rock types: Onyx, Marble, Sandstone, Granite, Limestone and the ever popular Basalt. Pages 32-53.

Bubbling Boulders

Our Handcrafted GFRC Fountains are as sturdy as real rock with a fraction of the weight. Molded and prepared by Blue Thumb's expert rock makers, each rock fountain is carefully designed to ensure it fools mother nature. Pages 54-63.

Metal Fountains & Garden Accents

Create your outdoor gallery with unique water features from our hand etched Copper Trees and Glass Flowers to the artist signed MOD Patio Fountains. Or design your garden with a historic twist with Sugar Kettles, Spouted Brass Bowls and Urns, or Tiered Garden Fountains. Pages 64-75.

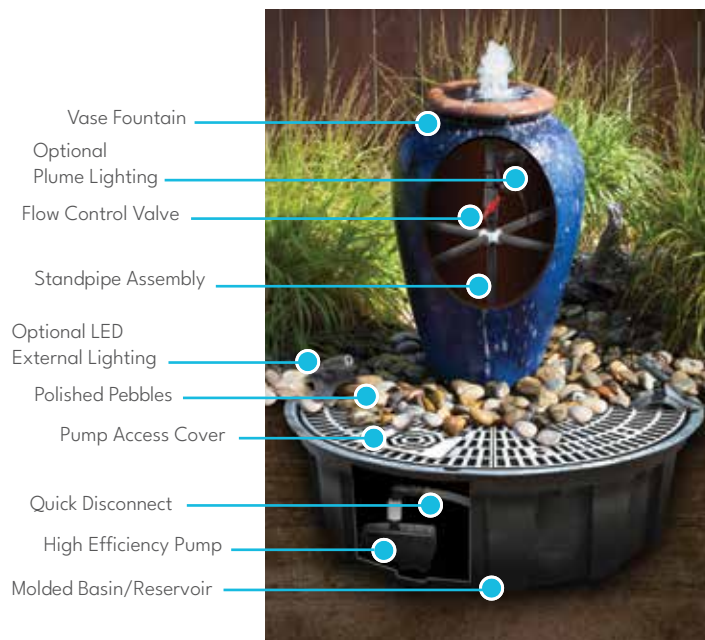

From our Michigan Factory to Your Landscape Project Anywhere in the U.S.

Our clean, spacious warehouse and state-of-the-art technology allows our team to create customized, high-quality products to make installation of your water feature kit quick and easy. You can trust our American-made products to stand up to everything Mother Nature dishes out.

How It Works

Our Fountain Kits simplify installation and maintenance. Inside a sturdy Basin, the durable Fountain Pump and Tubing push water up through the Fountain creating the iconic bubbling plume. The water flows down the sides, across the Polished Pebbles, and back into the basin. The heavy-duty Pump Cover allows easy access for maintenance. Single and Triple Fountains are similar in construct, with slight adjustments in Flow Control of the plumbing system and weight management. Take confidence in knowing your new fountain system is protected by US Patent #7,341,203 and backed by Blue Thumb's Knowledgeable Team.

Our Factory to Your Yard ~ How it Works

Vase Fountains

Homeowner DIY

Each is an Original Work of Art

The individually glazed Vase Fountains featured in our collections are intentionally unevenly glazed, providing a naturally rustic look, with variations in both color and texture. No two pieces are alike, but all share an inherent beauty. Each hand-glazed fountain vase has an individual character and is a distinctive, original piece of art.

Photo 26-1

Our Vase Collections

- Tuscany** – Popular, sun-washed glazed terra cotta look
- Stoned Urns** – Layered stone textured finish
- Oil Jar** – Smooth finish, slight rolled lip
- Sienna** – Waffle texture, wide mouth opening
- Genova** – Beehive style ringed pattern
- Milano** – Elongated neck with a flared top
- Luna** – Squared-off modern shape
- Amphora** – Ancient throwback with handle adornments
- Tivoli** – Sleek and tapered without a lip
- Provence** – Flat top with rounded shoulder

Photo 27-1

Photo 27-2

Tuscany

The fountains featured in our Tuscany collections are intentionally designed to provide a natural rustic look, with variations in styles, color and texture. No two pieces are alike, but all share an inherent beauty to enhance its setting in nature. Each fountain is a distinctive, original piece of art.

Photo 27-3

Stoned Urns

Each Stoned Urn fountain has a layered stone finish in a variety of stone styles, ranging from a flat slate to a rounded pebble look. The finishes offer a unique pattern for the water to cascade down.

Photo 27-4

Photo 27-5

Vase Fountains

Oil Jar

Curvy Oil Jar Fountains offer a smooth finish that water glides down. Oil Jar Fountains are a true statement piece to add to any landscape project and are offered in many colors and varieties. You are going to fall in love with this style.

Photo 28-1

Sienna

Sienna Fountains are substantial vases with robust openings. These fountains offer a waffle-style texture in different colors. Water ripples beautifully across the surface of these vases.

Photo 28-2

Photo 28-3

Genova

The Genova is a unique style vase. It offers a horizontal ringed pattern often giving a slight reminder of a beehive style. Fountain water has a nice rippled pattern as it flows down the side of the vase.

Milano

Milano Fountains feature stylish flared tops with a neck. The distinctive shape gives the water a unique path of travel off the lip and down the sides of these vases.

Photo 29-1

Homeowner DIY

Vase Fountains

Photo 30-1

Photo 30-2

Luna

Unique Luna Fountains offer a more modern looking vase featuring 90° angles. Most pieces in this collection are square and tapered with many offering a variety of different textures.

Photo 30-3

Amphora

Robust Amphora vases that have beautiful adornments (handles) decorating the top of the vases. This is a very popular and classic piece that fits in any landscape.

Photo 30-4

Tivoli

Tivoli Fountains feature a very sleek tapered design for a sophisticated style. These vases are available in a variety of different colors as well as textures. A nice addition to any landscape.

Photo 31-1

Provence

Provence and Tivoli Fountains are similar in style with their flat tops. However, the Provence has a rounded shoulder directing water flow gently down the vase.

A Variety of Styles and Shapes

Created from sturdy natural rock, some feature all four sides smooth while some have three sides smooth with one side naturally chiseled. Some are rough and some are smooth. All provide a beautiful focal point in any garden.

Our Real Stone Collections

Artisan Series – Cuts from real stone create lovely colorful patterns in many shapes and sizes, each naturally unlike any other. Pages 33-43.

Architect Series – These beautifully sliced Artisan Fountains are one-of-a-kind and we have the item shown in-house! Page 36.

Basalt Series – A natural rustic reddish tone to nearly black. Basalt has become very popular due to its extremely low maintenance. Pages 44-47.

Zenshu Series – A collection of basalt and granite fountains with a peaceful Japanese Zen garden influence. Pages 48-53.

Artisan Series

Real Stone Fountains ~ Our Palette

Every stone pulled from earth has its own mineral color, veining and speckles; each a uniquely detailed artistic expression. That's why we call this our Artisan Series.

Onyx primarily refers to the parallel banded variety of the silicate mineral. This stone can be almost any color. Our cuts are usually yellow, red or black.

A veined metamorphic rock that produces an elegant allure, **Marble** is a hard stone and offers a rich spectrum of color and veining.

Loved for its versatility and resistance to weathering, the pattern found in any individual piece of porous **Sandstone** is always completely unique.

A natural igneous stone that began as magma and slowly cooled. **Granite** is a sturdy stone with a classic elegance that comes in a variety of "looks."

Radiant **Limestone** is extremely strong and long-lasting. It was formed under water and contains fossils and remnants of ocean life from long ago.

Photo 33-1

Our Real Stone Artisan Styles

Triple Kits – Place three flowing Real Stone Fountains of varying height together and you have a harmonious focal point in your yard or garden.

Towers – Single or matched with similar style, Colorful stone cuts create lovely patterns in the many shapes and sizes.

Shaped Stone – These fountains come cut in many shapes including almonds, spheres, and millstones. Choose your type of stone and shape. Great for smaller areas!

Architect Series – Our one-of-a-kind Real Stone cuts are offered a variety of stone choices: Onyx, Marble, Sandstone, Granite, and Limestone. Each cut reveals a unique tone and lovely pattern.

Real Stone Fountains - Zenshu Series

Zenshu Fountains were created to offer you unique options of real stone fountains. Borrowing from Japanese Zen garden influence, these fountains create beautiful, subtle conversation pieces with their blend of natural earth tones with black polished accents while inviting you to sit and meditate with nature.

Zenshu Series Big Block Fountains

Featuring a hefty Zenshu Fountain style that makes a statement wherever placed. When a customer requested a version of our Shizukesa that had more water flow, we responded with our Triple Drilled Yasuyuki Fountain!

Single Drilled Shizukesa Fountain

Heiho Fountains A Zenshu Favorite

Part of our Zenshu Fountain Series, the Heiho Fountain provides a simple way to add interest to your landscape with its smooth sides and flat surface surrounding a small fountain spectacle. Situated in the corner of a rock or stone bed or as a repeated form, the smooth pooling of water is a calm display of serenity that preludes the cascading of the element to the space below.

Real Stone Fountains ~ Zenshu Series

Creating Zen in Your Backyard

The Japanese dry garden or Japanese rock garden is often called a Zen garden. It is a miniature stylized landscape of organized arrangement of rocks, water features, moss, pruned trees and bushes, and uses sand or gravel raked to represent ripples in water. They were intended to imitate the essence of nature for meditative purpose.

Real Stone Fountains ~ Zenshu Series

Basalt Series

Basalt is volcanic rock that formed at the earth's surface where it hardened from lava that cooled relatively quickly. Because of its high iron content it is our heaviest stone. The metal content also causes "weathering" in basalt stone, giving it a rustic reddish tone that when polished turns black. That's how we can produce its two-tone look.

Our Earthy Rustic Basalt Fountains

Basalt Fountains are growing in popularity because they provide homeowners with all the benefits of a customary water feature, including both audio and visual attraction, with extremely low maintenance.

Rustic Basalt Triple or Single Kits

These Rustic Basalt Column Fountain kits can be a single solitary basalt or better yet grouped together to create a group of three fountains. A lighting kit may be added to beautifully illuminate your fiery fountains at night.

Triple Rustic Basalt Fountain Kits

Triple Basalt Fountain 8" - 10" Dia

- ABBC100 18"H, 24"H, 30"H
- ABBC125 24"H, 30"H, 36"H

Handcrafted Rock Fountains

Blue Thumb Manufactures A Variety of Handcrafted Styles and Shapes

Handcrafted Rock Fountains are as sturdy as real rock, with a fraction of the weight. We start with one of our custom-designed molds created from actual stone boulders. Each boulder is molded and prepared by hand at Blue Thumb and follows a careful process ensuring they are ready for your landscape.

What is **GFRC**

GFRC stands for Glass Fiber Reinforced Concrete. GFRC is a lightweight, durable material that can be cast into nearly unlimited shapes, colors and textures making it a great material for our bubbling boulders.

Engineered to Look Like Real Stone at a Fraction of the Weight Designed to Create A Majestic Dreamscape in a Small Space

All of our GFRC boulders are made in-house by our trained staff. We search out only the finest boulders from nature to create molds from so we can offer you a very natural and realistic fountain.

The benefit of our in-house lightweight handcrafted boulders is that they offer you the option for a unique natural design in an uncharacteristic space.

Dapple Gray

Chestnut

Blue Thumb's expert rock makers carefully hand paint every rock to ensure it replicates the natural beauty of real rock. All of our handcrafted rocks are available in either Dapple Gray or Chestnut.*
*Chestnut is a special order color needing a two week lead time.

How Our GFRC Fountains Are Made

We start with one of our custom-designed molds created from actual stone boulders. Our GFRC rock mixture is carefully measured and mixed before it is packed into the prepared mold by hand then it is baked, cooled, and removed from the mold to cure. Each rock is inspected and rough spots are sanded, chiseled, or burned away. Any thin parts of the molded rock are reinforced with more GFRC mixture. When the rock is fully shaped, it is carefully hand painted and sealed to give the rock its natural look.

Slate River Falls Fountain (at right)

At right is one of our favorite designs. Reminiscent of our slate bottom waterways throughout Michigan. This low profile GFRC Fountain is 36" x 30" x 12"H and weighing approximately 66 lbs.
• LA3350K

Large Format Handcrafted Bubbling Boulders

Natural stone formations are Blue Thumb's inspiration for handcrafting our durable GFRC Rock Bubbler creations. The benefit is a lighter fountain, which means our large Handcrafted Rock Fountains can be installed without the heavy machinery required for similar sized Real Stone Fountains.

For comparison, the Manistique Falls Fountain shown here is a fraction of the weight of real rock at 51" x 31" x 13"H and weighing approximately 150 lbs. Our largest Real Stone Fountain, the Triple Drilled Ichise, seen on page 51, is 48" x 27" x 10"H and weighs about 1500 pounds.

Manistique Falls Fountain (at left)

Our largest GFRC Handcrafted boulder. Stately in size, this fountain is a fraction of the weight of real rock at 51" x 31" x 13"H and weighing approximately 85 lbs.
• LA3300K

Sometimes You Have Space, Sometimes You Don't

Our Mountain Spring fountains win the popularity contest in our Handcrafted Rock Fountain Series. Mountain or Mini, quality construction ensures years of enjoyment, without weight gain. That's a perfect dream right there!

Metal Fountains & Garden Accents

Copper Trees and Flowers – Crafted copper creates a striking visual as water dances from leaf to leaf down our copper trees, as well as spouting out of glass blooms. Pages 65-67.

Rustic Sugar Kettles – A popular garden feature, cast iron sugar kettles can fountain and/or spillover water or contain fire. There are so many design options! Pages 68-69.

Brass Patina Bowls and Urns – Bring both a fountain and a mini falls with our spillway style brass garden fountains. As bowls or squared up for a more modern presence. Page 70.

MOD Fountains – Signed by the artist, these modern steel fountains are minimal art sculptures that incorporate the element of water. Page 71.

Garden Accents & Lighting – Tiered Garden Fountains, Stone Benches, Stack Pebble Fountains, & Lighting; a mirabilia of garden features and accessories. Pages 72-78.

Burning Boulders – With or without a bubbling fountain, our fire boulders make a natural lawn statement perfect for spaces requiring an intimate fire pit. Page 78.

Glass Flowers

We love how water spouts out of each beautiful glass-blown blossom by way of copper stems and pistils. Adorned by handcrafted copper leaves, these extraordinary fountains will add that “wow” factor to any garden.

Lake Fountains & Earth Pond Waterfalls

Keep Your Water Fresh & Sparkling

Stagnant water hosts algae, mosquitoes and other pests that can make your lake or pond inhospitable for the fish and aquatic plants you want to sustain. Aeration is key to clearer, healthier ponds.

Water Clarity With Waterfalls

Adding waterfalls to earth ponds has become increasingly popular recently. Until recently, there wasn't a good design that addressed the challenges that come with completing this type of installation. Our system incorporates an external pump that draws water through a slotted pipe intake system (buried in gravel to reduce clogging) and then up to the waterfall box. This system assists in aeration and eliminates stratification of the water as well.

Floating Fountains For Lakes and Large Ponds

Lake Fountains both beautify your body of water with an elegant display pattern and provide valuable oxygen and agitation to promote a healthy pond or lake. They offer outstanding oxygen transfer rates, aesthetically pleasing patterns and low overall operating costs. Each unit is fully-self contained and floats into place in your pond or lake.

Add LED lighting for night viewing

DAY

NIGHT

How It Works

These fountains are ideal for ponds 1/4 acre in size or larger. They can be used in Large Lake Ponds or reflection pools as a stunning center display. Interchangeable nozzles are included and allow you to create unique spray patterns. The Motor draws low amp loads to conserve energy and lights illuminate the fountain using LED technology. Choose your spray patterns, pattern dimensions and LED lighting for night viewing.

Fire & Water Boulder Fountain Kit

One of our larger GFRC Handcrafted Bubbling Boulders, it bubbles and burns! Stately in size, this fountain is a fraction of the weight of real rock at 45" x 36" x 12"H and weighing in at approximately 120 lbs.

Fire Up with Burning Boulders

Ignite the night!

Whether it's a cool evening with family, friends, and neighbors, or a relaxing night alone, enjoy your backyard or hardscape even more by adding the ambiance of firelight with a Blue Thumb Fire & Water Rock Fountain, or one of our GFRC Burning Boulders!

Medium GFRC Burning Boulder Fire Kit

Rock Dimensions: 36" X 21" X 13"H
Rock Weight: Approx. 50 lbs.
• LA3555K

Made of Glass Fiber Reinforced Concrete, (GFRC) these rocks are lightweight, sturdy, easy to maintain, and easier to love.

Large GFRC Burning Boulder Fire Kit

Rock Dimensions: 42" X 32" X 9"H
Rock Weight: Approx. 60 lbs.
• LA3580K

We Manufacture Products to Help You Design, Install, & Manufacture Better Water Features

We hope we got some wonderful ideas rolling in your head!

Throughout this Inspirations Book are tagged photos sent in by some of our partners in designing spaces and installing Blue Thumb water features. These are just a few of the thousands of professionals we partner with across the nation.
